

Fire Danger Ratings

WHAT DO THEY MEAN FOR YOU?

Knowing what they mean could save your life

- If you live or travel through an area where a bush fire can start you need to know what the Fire Danger Rating is and what it means so you can make the safest decision.
- The Fire Danger Rating is the indication of the consequences of a bush fire if a bush fire was to start.
- The higher the Fire Danger Rating the more dangerous the conditions and the more likely that people will be injured or die if a bush fire occurs.
- When the Fire Danger Rating is Extreme or Catastrophic for your area, any fires that start will be extremely hard for fire authorities to control. Even a well prepared, well constructed and actively defended home may not survive.
- If Catastrophic conditions are expected the best option is to leave early the day or hours before a fire threatens.
- Keep informed - check the Fire Danger Rating for your area at www.rfs.nsw.gov.au
- PREPARE your Bush Fire Survival Plan today. Know your trigger points and download a plan from www.rfs.nsw.gov.au

On days of Catastrophic or Extreme Fire Danger put your survival first and leave early.

FIRE DANGER RATING	WHAT YOU SHOULD DO
CATASTROPHIC	<p>For your survival, leaving early is the only option.</p> <p>Leave bush fire prone areas the night before or early in the day – do not just wait and see what happens.</p> <p>Make a decision about when you will leave, where you will go, how you will get there and when you will return.</p> <p>Homes are not designed to withstand fires in catastrophic conditions so you should leave early.</p>
EXTREME	<p>Leaving early is the safest option for your survival.</p> <p>If you are not prepared to the highest level, leave early in the day.</p> <p>Only consider staying if you are prepared to the highest level – such as your home is specially designed, constructed or modified, and situated to withstand a fire, you are well prepared and can actively defend it if a fire starts.</p>
SEVERE	<p>Leaving early is the safest option for your survival.</p> <p>Well prepared homes that are actively defended can provide safety – but only stay if you are physically and mentally prepared to defend in these conditions.</p> <p>If you're not prepared, leave early in the day.</p>
VERY HIGH	<p>Review your Bush Fire Survival Plan with your family.</p> <p>Keep yourself informed and monitor conditions.</p> <p>Be ready to act if necessary.</p>
HIGH	
LOW MODERATE
